

## **Recommendation of Clark Scientific Editing.**

Dear Colleague,

I have known Dr Catherine Clark for many years, during her student years and subsequently as a fine scientist. She has been praised in the testimonial of Professor Stephen Phillips, which appears on this website. I wish to add to this here, because my Japanese colleagues have been very impressed with her work on their manuscripts, and I myself have also reason to be most impressed. I am a native English speaker, but I approached her to help me format a large review I had completed. I was delighted with the detailed corrections and conscientious effort she put into this work.

I am, therefore, particularly anxious that colleagues worldwide in Parasitology and other biological sciences avail themselves of this excellent editing service.

**Emeritus Professor John Kusel, University of Glasgow**
